

GS705-30
GEM GS705-30 Slim Shear Lock For Swing And Glass Doors

Description

The Gem GS705-30 Slim Shear Lock is a powerful and discreet solution for securing various door types. This innovative electromagnetic lock offers exceptional holding force, a concealed mechanism, and compatibility with narrow frames and glass doors. With its versatility, reliable operation, and optional features, the Gem GS705-30 is the ideal choice for enhancing the overall security of your premises while maintaining a clean and modern aesthetic.

Key Features:

- **Slim Design:** The GEM GS705-30 provides a discreet appearance that complements any architectural style.
- **Superior Holding Force:** Delivers a strong 2,000lbs of holding force for reliable door security.
- **Concealed Mechanism:** Maintains a clean aesthetic as the lock is hidden within the door frame.
- **Suitable for Narrow Frames, Double Swing Doors, and Glass Doors:** Offers exceptional versatility for various door types.
- **Fail-Safe Operation:** Ensures a safe exit as the lock automatically releases when power is lost.
- **Horizontal or Vertical Installation:** Provides flexibility for different door placements.
- **Mortise Mount:** Allows for a flush and professional finish within the door frame.
- **Door Status Monitoring:** Confirms door lock status with the built-in bond sensor.
- **Adjustable Armature Screws:** Accommodates wider door gaps for a secure fit.
- **Special Push-Off Device:** Eliminates residual magnetism, ensuring smooth door opening.
