

SR1-REX-ST06-VP
ST06-Series Large Push To Exit Button with Stainless-Steel Backplate

Description

The ST06-Series Large Push to Exit Buttons provide a reliable and stylish solution for access control applications. These buttons combine exceptional durability, user-friendly design, and customisable features, making them a valuable asset for any building requiring a secure and efficient exit strategy. With their versatility and ease of installation, the ST06-Series buttons are the perfect choice to enhance your access control system.

Key Features:

- **Durable Stainless-Steel Backplate:** Provides a stylish and long-lasting finish that complements any environment.
- **Large 35mm Zinc Alloy Flush Button:** Easy to locate and operate, even in low-light conditions.
- **Customisable Legend:** Choose between "Press-to-Exit" (SKU: SR1-REX-ST06PTE) or "Door Release" (SKU: SR1-REX-ST06DR) legends to suit your specific needs.
- **Flush-Mount Design:** Creates a clean and professional appearance (optional back box required for surface mounting - sold separately).
- **Selectable Contact Configuration:** Offers both COM-N/O and COM-N/C options for compatibility with most access control systems.
