RGL EBWLS Exit Buttons With Large Push-Button

Description

The RGL EBWLS series of exit buttons with large push-button, provide a practical and accessible solution for access control applications. These buttons, featuring a large, easy-to-use rocker switch and clear labelling, promote effortless operation for users with varying abilities. With their versatility, durability, and straightforward integration, RGL EBWLS buttons are a valuable addition to various commercial, public, and multi-residential settings.

Key Features:

- **Large Rocker Switch:** Designed for effortless activation, even for users with limited hand dexterity.
- **Clear Labeling:** Available with either "DOOR RELEASE" or "PRESS TO EXIT" legends for easy identification and intuitive operation.
- **Versatile Mounting Options:** Includes a surface box for surface mounting or can be directly mounted onto existing flush backboxes, providing flexibility for various installation scenarios.
- **Durable Construction:** Manufactured from high-quality gloss white plastic for a sleek and long-lasting design.
- **Single Pole "Push To Make" Contacts:** Offers straightforward electrical connection for integration into access control systems.
- **Compact Size:** With nominal dimensions of H85 x W85 x D28mm (including surface backbox), the buttons maintain a discreet profile while remaining easily accessible.
