GEM DDA900 Series Of Disability Friendly Exit Buttons

Description

The GEM DDA900 series of disability friendly exit buttons go beyond functionality, promoting a more inclusive environment for everyone. These user-friendly buttons offer a clear visual cue, a comfortable tactile experience, and easy operation for users with varying abilities. With their durable construction, versatile design, and multiple configuration options, the GEM DDA900 series is a valuable addition to any building seeking to prioritise accessibility and a positive user experience.

Key Features:

- **Disability-Friendly Design:** Large, raised button (110mm) with contrasting colours and a clear wheelchair symbol (optional) ensures easy identification and operation for users with visual impairments or limited mobility.
- **Tactile Feedback:** The raised button surface provides a clear tactile response for users with visual impairments.
- **Multiple Legend Options:** Choose between buttons featuring the wheelchair symbol, "Push to Open" text, a combination of both, or a blank option for custom labelling.
- **Surface Mount Design:** Simple and versatile surface mounting allows for easy installation in various locations.
- **Choice of Contact Configuration:** Available with a variety of contact configurations (COM/NO/NC/Change-over) to suit your specific wiring needs.
