

INT-06-014-VP

Intratone 06-014 Series Call Caretaker Intercom System – 1 to 3 Call Buttons

Description

The Intratone IntraBox is a valuable asset for any property with a dedicated caretaker. This audio intercom system fosters clear communication, offers optional access control features, and provides long-term value with its pre-paid data plan. The user-friendly design, remote management capabilities, and durable construction make the IntraBox a reliable and cost-effective solution for connecting residents and the caretaker or building manager.

Key Features:

- **Call Caretaker Function:** Provides residents with dedicated buttons (up to 3 available) to directly initiate intercom calls to the pre-programmed phone number of residents and the caretaker or building manager.
- **3G Mobile Network Connectivity:** Ensures reliable communication for intercom calls over the cellular network.
- **Optional Proximity Reader Compatibility:** (not included) Offers an additional layer of security and access control (requires separate purchase).
- **Flush-Mounted Design:** Creates a sleek and professional aesthetic for your building entrance.
- **Stainless Steel Finish:** Provides a durable and modern look that complements various architectural styles.
- **Pre-Paid Data Plan:** Includes a 15-year pre-paid data plan, eliminating ongoing call charges for intercom communication.
