

WRT-2M

Farpointe Data WRT-2M Ranger "Mini" 2-Button Transmitter – No Proximity / Smartcard Module

Description

Ranger from Farpointe Data sets the electronic security benchmark for high frequency, long-range identification Receivers and Transmitters. Ranger Transmitters are active devices powered by a commonly-available CR2032 coin cell which is user-replaceable. The WRT-2M "Mini" transmitter is a basic version featuring 2-button operation without the capability for an optional passive access control credential.

- IP67-rated for outdoor use
- Transmitter times-out when button is held down continuously preventing battery drain and potential interference with other transmitters
- Rolling-code security combined with sophisticated encryption provide best-in-class security
- Farpointe Data MAXSecure encoding for additional security
