

SR1-MAG-ASK
Armature Safety Strap Kit

Description

Suitable for where an assessment has identified a need to reduce the risk of the maglock armature-plate falling from the door. The wire safety strap is affixed to one end of the armature-plate and then secured to the door. Please note that the armature-plate will need to be drilled to allow the strap to be affixed. Kit comprises of 1 strap, 1 screw, 1 drive rivet and a tube of glue. Armature-plate not included.
