

RX690  
Third Millennium RX690 Fingerprint Reader with MIFARE Card Reader

**Description**

The RX6 advanced access fingerprint control reader is an elegantly designed unit, delivering the latest *multispectral* imaging technology. The unit has a black high gloss finish, and can be fixed to a plain wall surface, or directly to a standard single gang US back box. *TEMPLATE-ON-A-CARD* - This biometric reader allows you to record, encrypt and digitally embed your fingerprint direct to your RFID access card. The RX6 does not need a central core database of fingerprint records, and may operate as a stand-alone unit (subject to control panel access authorisation). Fingerprint enrolment requires 'system administrator' authorisation.

## Product Specifications

Weight	0 kg
Brand	Third Millennium
Material	Polycarbonate
Mounting	Surface Mount
Operating-temperature	-35°C to 66°C
Protection-rating	IP54
Connection-type	Terminal connection
Frequency	13.56 MHz
Voltage	75 mA, 8-12 VDC
Output-protocol	Wiegand
