

EBPP02P/DDA/WOPTO
RGL EBPP02P/DDA/WOPTO Push Plate DDA Button

Description

The RGL EBPP02P/DDA/WOPTO push plate DDA button offers a dependable and accessible solution for door exit control. This DDA-compliant design, combined with its user-friendly features and reliable operation, makes it a valuable addition to various applications where ease of use and accessibility are essential.

Key Features:

- **Universal Accessibility:** Meets BS8300 standards and features a 360° push plate for effortless activation from any angle.
- **Effortless Operation:** Momentary switch for quick and easy door opening.
- **Built to Last:** High-impact plastic back box ensures long-lasting durability.
- **Flexible Installation:** Choose between surface or flush mounting for a perfect fit in any environment.
- **Low Maintenance:** Easy-clean surface minimizes cleaning efforts.
- **Broad Compatibility:** Double pole NO/NC contacts and 4 amp output work seamlessly with various access control systems (30VAC/DC).
- **Clear and Consistent:** Wear-resistant legend maintains button clarity over time.
- **Enhanced Security:** Security screws prevent tampering and unauthorized access.
- **Safe Integration:** Voltage-free contacts offer safe and versatile connections with different control systems.
- **Simple Flush Mounting:** Screw footprint allows for easy installation on a standard gang box.
