

COM-1424
Comelit-Pac 1424 Simplebus Top Switcher

Description

The Comelit-Pac 1424 Simplebus Top Switcher is an invaluable asset for expanding and optimising Comelit Simplebus systems. This feature-rich switching device empowers you to create large-scale networks, integrate multiple kits seamlessly, and manage your intercom system with greater control and efficiency. With its scalability, integration capabilities, and management features, the Comelit-Pac 1424 is the perfect solution for complex building intercom requirements.

Key Features:

- **Supports Up to 120,000 Users:** Ideal for expansive building complexes or communities requiring a robust intercom system.
- **Multi-Kit Integration up to 500 Comelit Simplebus Kits:** Seamlessly combine multiple Simplebus kits into a single, unified network.
- **Independent Main and Secondary Switchboards:** Enables separate call routing and management for designated areas within the system.
- **Alarm Signal Routing:** Direct specific alarms to designated switchboards for faster emergency response.
- **Cascaded Bus Line Distribution:** Optimises cabling for improved signal transmission, especially before mixers like 4888 and 4888C.
- **Self-Powered LS|LS Input:** Simplifies riser management without requiring an additional external unit.

Product Specifications

Weight	0 kg
Brand	Comelit-PAC
Operating-temperature	5°C to 40°C
Mounting	DIN-Rail
Construction	Plastic
Colours	White
Door-entry-system-component	Switches & PSU's
