

ACTPRO-100
ACTpro-100 single-door Station/expander (DS100) in plastic enclosure, no PSU

Description

The ACTpro-100 is a single door-station that connects to the "downstream" RS485 serial bus of an ACTpro-1500 or ACTpro-1520 controller. Many ACTpro100 door stations can be connected to the same RS485 bus on one ACTpro controller in this way enabling the system to be easily expanded without the need for multiple ethernet CAT5 connections. The decision to grant or deny access is made by the ACTpro Controller. The ACTpro-100 is also available with an integral power supply - see ACTpro-1002A.

Product Specifications

Weight	0 kg
Brand	ACRE
Voltage	12 VDC, 2A
Operating-temperature	-10°C to 50°C
Material	ABS
Mounting	Surface Mount
Access-control-system-type	Networked
