

INT-06-0129
Intratone 06-0129-EN Intrabox Data Mini with built-in HF Receiver

Description

The Intrabox Data Mini is a GSM-based controller with a built-in 868MHz keyfob receiver and antenna. Primarily intended for parking applications to operate up to 2 barriers or garage doors, the Data Mini provides a relay output when an enrolled keyfob-style remote control is operated - the relay contacts being intended for the dry-contact input of a gate / barrier / door system. Up to 10,000 keyfobs can be added (or changed / deleted) by accessing the Intratone website-based portal which then connects to the Data Mini via the GSM mobile phone network and sends the updates. The Data Mini includes unlimited data and synchronisation for 10 years.

Product Specifications

Weight	330 kg
Brand	Intratec
Frequency	868 MHz, GSM
Voltage	12-24 VDC/VAC
Output-relays	2
Operating-temperature	-20°C to 60°C
