

SR1-MAG-1200AL
Adjustable L Bracket For Standard Maglocks

Description

The Adjustable L Bracket For Standard Maglocks is a valuable asset for optimising standard (1200lb holding force) mag lock installations. This versatile bracket allows for precise positioning, simplifies mounting, and offers a durable and stylish design, making it suitable for various access control applications on outward opening doors.

Key Features:

- **Adjustable Design:** Offers 24mm of adjustment in 8mm intervals for perfect maglock placement on outward opening doors.
- **Multiple Fixing Points:** Provides four selectable positions for the maglock, enabling precise alignment with the armature plate.
- **Easy Installation:** Simplifies the mounting process for standard maglocks.
- **Satin Anodised Aluminium Finish:** Offers a sleek and modern aesthetic that complements various architectural styles.
- **Durable Construction:** Made from aluminium for long-lasting performance.
- **Standard Maglock Compatibility:** Works seamlessly with a wide range of standard maglocks.
- **Suitable for Double Maglocks:** Two brackets are required for secure double maglock installations.
