

PL23
Farfisa PL23 3-Button Call Module

Description

The Farfisa PL23 offers a significant upgrade for your Profilo series door station. This 3-button call module provides exceptional versatility, allowing for expanded control, improved communication, and potentially enhanced security within your building. The high-quality materials and backlit name holders ensure both durability and improved visibility in low-light settings.

Key Features:

- **Three Programmable Call Buttons:** Provides increased functionality for various intercom functions or access control applications.
- **Seamless Profilo Integration:** Designed to perfectly complement existing Profilo door station modules with integrated speakers.
- **Aluminium Construction:** Lightweight yet durable aluminium construction ensures long-lasting performance.
- **Stainless Steel Buttons:** High-quality stainless steel buttons provide a touch of elegance and durability.
- **Green Backlit Name Holders:** Improves visibility in low-light conditions for better identification.
- **Modern Aesthetic:** Maintains the sleek and stylish design of the Profilo series.
