

PL21
Farfisa PL21 1-Button "Profilo" Door Station Module

Description

The Farfisa PL21 offers a practical and aesthetically pleasing solution for expanding the functionality of your Profilo series door station. This 1-button module seamlessly integrates with your existing system, maintaining a modern design while providing additional control options. The high-quality materials and backlit name holders ensure both durability and improved visibility.

Key Features:

- **Single Call Button:** Offers an extra button for expanded control options within your intercom system.
- **Seamless Profilo Integration:** Designed to perfectly complement existing Profilo door station modules with integrated speakers.
- **Aluminium Construction:** Lightweight yet durable aluminium construction ensures long-lasting performance.
- **Stainless Steel Button:** High-quality stainless steel button provides a touch of elegance and durability.
- **Green Backlit Name Holders:** Improves visibility in low-light conditions for better identification.
- **Modern Aesthetic:** Maintains the sleek and stylish design of the Profilo series.
