

MD23
Farfisa MD23 3-Button Module for The Mody Door Station

Description

The Farfisa MD23 3-Button Module for The Mody Door Station offers a practical and versatile solution for expanding the functionality of your Mody series door station. This 3-button module provides additional control options and improves communication within your building. The sleek design and versatile mounting options allow for seamless integration into your existing entrance system.

Key Features:

- **Three Call Buttons:** Expands call capabilities for simplified access control or intercom communication.
- **Aluminium Construction:** Lightweight yet durable design ensures long-lasting performance.
- **Modern Aesthetic:** Sleek aluminium finish complements existing Mody door station components.
- **Modular Design:** Seamlessly integrates with other Mody series modules and accessories.
- **Versatile Mounting Options:** Wall-mountable with a back box, module frame, or rain shelter for flexible installation.
