

PL24
Farfisa PL24 4-Button Call Module

Description

The Farfisa PL24 represents the pinnacle of expansion modules for your Profilo series door station. This 4-button call module offers unmatched versatility and control, fostering clear communication and potentially improving security within your building. The high-quality materials and backlit name holders ensure both durability and improved visibility in low-light settings.

Key Features:

- **Four Programmable Call Buttons:** Provides the ultimate level of functionality for intercom calls, access control, and various programmed functions.
- **Seamless Profilo Integration:** Designed to perfectly complement existing Profilo door station modules with integrated speakers.
- **Aluminium Construction:** Lightweight yet durable aluminium construction ensures long-lasting performance.
- **Stainless Steel Buttons:** High-quality stainless steel buttons provide a touch of sophistication and durability.
- **Green Backlit Name Holders:** Improves visibility in low-light conditions for clear identification.
- **Modern Aesthetic:** Maintains the sleek and stylish design of the Profilo series.
