

PRS210ED
Farfisa PRS210ED DIN-Rail Transformer

Description

The Farfisa PRS210ED DIN-rail transformer offers a convenient and reliable solution for powering your 1+1 audio intercom system. This versatile unit provides efficient power delivery, simplifies installation, and integrates seamlessly with your existing system's electronic ringer functionality. With its compact design, VDE certification, and multiple mounting options, the PRS210ED is a valuable asset for ensuring clear and uninterrupted communication within your building.

Key Features:

- **1+1 System Compatibility:** Designed specifically for use with Farfisa's 1+1 audio intercom systems with electronic call functionality.
- **13VAC Output:** Delivers stable power to operate your intercom system effectively.
- **15VA Power Rating:** Provides ample power for continuous system operation.
- **DIN-Rail Mounting:** Enables easy and space-saving installation within your electrical panel.
- **Wall Mountable:** Offers flexible mounting options to suit your specific needs.
- **VDE Certified:** Ensures compliance with stringent safety standards for peace of mind.
- **Electronic Ringer Integration:** Includes a built-in electronic ringer for clear audio notification.
