

COM-2708W/A
Comelit 2708W/A 2 Button Audio Entry Phone – Simplebus 1

Description

Simplebus1 Mini Door Entry Handset PRODUCT CODE: 2708W/A

Upgrade your Simplebus 1 audio system with the Comelit 2708W/A 2 Button Audio Entry Phone. This mini-series door-entry phone with a handset offers essential features for seamless communication. Equipped with a key button, additional service buttons for calls to the porter switchboard, call volume adjustment, Silent mode (Privacy), and floor call input, this entry phone covers all your audio communication needs. Convenience meets functionality with invisible magnetised panels that ensure correct positioning of the handset on the base.

- Hands-free full-duplex audio: Allows you to communicate with visitors without having to pick up a handset.
- Key button: For opening the door or gate.
- Button for additional services: Can be programmed to call the porter switchboard, other door entry phones in the system, or other devices.
- Call volume adjustment: Allows you to adjust the volume of the call signal to your liking.
- Silent mode (privacy): Mutes the call signal so that you are not disturbed.
- Floor call input: Allows you to call the elevator from your door entry phone.
- 2-wire connection: Easy to install and connect.
- Powered by the Simplebus 1 system: No need for a separate power supply.

Note: This product supersedes the obsolete 2708W.
