

STI-6931
Protective Cover For Fire Alarm Break Glass Units With Spacer

Description

Maintains the visibility and functionality of your emergency devices, by installing a clear Protective Cover For Fire Alarm break glass units. This surface mount stopper is constructed from clear UV stabilised polycarbonate protective cover for exit button, switch or emergency break glass call point to prevent damage and misuse. Includes 5mm spacer suitable for a surface mount installation switch/call point or if conduit entry is required for cables. **Key Features:**

- Clear polycarbonate construction for visibility and aesthetics
- UV-stabilised material for long-lasting protection against sun damage
- 5mm spacer included for surface mount installation or conduit entry
- "IN CASE OF FIRE LIFT COVER - BREAK GLASS" legend for fire applications

Additional Notes:

**The image shown includes an emergency call point for illustrative purposes only. The call point is not included with the protective cover but is available separately.*
