

ACT365-VR20/50-2A

Acre ACT365 "Ready2Go" Kits With ACU-2P Controller With 2A PSU and MiFare Reader or Keypad

Description

The ACT365 Access Control Kits With 2A Power Supply empowers you to manage your access control system with greater efficiency and enhanced security. This comprehensive kit combines cloud-based management features, advanced access control functionalities, and secure reader technology, offering a future-proof solution for diverse security applications.

Kit Components:

- **Vanderbilt ACT365-ACU-2P Single-Door Cloud IP Controller with 12VDC 2A Power Supply Unit:**
 - Cloud-based management through the ACT365 platform for remote access, real-time monitoring, and user management.
 - Simplified installation with a pre-included 2A 12VDC power supply and space for a backup battery (not included).
 - Advanced access control functionalities for managing users, credentials, and access groups.
 - Enhanced security features like door monitoring, fire alarm override, voltage monitoring, and tamper detection.
 - Flexible connectivity options, supporting various reader types and Ethernet ports for network integration.
 - Robust construction with a durable ABS enclosure for reliable performance in diverse environments.
- **Acre VR50M-MF or VR20M-MF MiFare Reader / Keypad:**
 - Advanced MiFare card technology for encrypted access control with a wide range of compatible cards.
 - Integrated keypad for an additional layer of security and PIN code access alongside card credentials (*VR50 Only).
 - Multicolour programmable light frame for clear visual access status indication.
 - Durable design built to withstand harsh weather conditions.

Product Specifications

Weight	kg
Brand	ACRE
Access-control-system-type	Cloud
Mounting	Mullion
Kit	Yes
Reader-and-card-technology	MIFARE
Power-requirement	Built in PSU
Device-type	Keypad, Reader
