

SR1-REL-M1-VP
M1A Series Euro-Style Electric Strike with Adjustable Jaw – Fail Safe or Secure Option

Description

The Euro electric release with adjustable jaw offers a practical and secure solution for access control in various internal environments. This fail-secure design prioritises security, while the adjustable jaw ensures a smooth installation process. With its versatility and affordability, the Euro electric release is a valuable addition to access control systems for internal doors.

Key Features:

- **Fail-Secure Operation:** Ensures the door remains locked in the event of power loss, enhancing security for your premises. (Please note: This model is recommended for low-security internal use.)
- **Adjustable Jaw:** Allows for precise alignment with the door strike plate, ensuring proper lock engagement.
- **Euro Style Release:** Compatible with standard Euro-profile mortice or rim locks for a versatile application.
- **Voltage:** 12V AC or *DC (**Please note that this "fail-safe" version is suitable for use with DC current only due to the construction of the operating solenoid*)
- **Mortice or Rim Fitting:** Provides installation flexibility for different door setups.
- **Outward Opening Rim Release Option:** Suitable for use with outward-opening rim doors (available upon request).
- **Current:** 1.1A & 250 mA (**Fail Safe Option*)
- **Includes suppression**
