

DU-KS-VP

RGL DU-KS Series Emergency Door Release With Integrated Key Switch

Description

The RGL DU-KS Series Emergency Door Release With Integrated Key Switch combines a choice of a momentary or maintained key switch (please select when ordering) with an emergency door release, offering a dependable solution for access control and emergency egress. This unit provides a practical and user-friendly option for various door applications, promoting security and ensuring safe emergency exits. With its easy installation, clean design, and versatile functionality, the RGL DU-KS/1 and the RGL DU-KS/2 are a valuable addition to security systems in different environments.

Key Features:

- **High-Impact Plastic Back Box:** Ensures durability and a clean aesthetic.
- **Key Switch With Latching On/Off Operation:** Provides secure key control over door access.
- **Key Removal in Both Positions:** Offers added security and convenience.
- **Supplied with 2 Keys:** Allows for key distribution and access control.
- **Voltage-Free Contacts:** Enables compatibility with various access control systems.
- **Triple Pole:** Provides versatile connection options.
- **Audible/LED Selection:** Choose between audible buzzer or LED indicator for exit activation feedback.
- **12/24V Operation:** Compatible with different power supply setups.
- **Plastic Front Covers:** Flip-up design simplifies emergency exit activation.
