Javelin DNA Pro – Automatic Direct-To-Card ID Card Printer For Single Or Double Sided Printing

**Description**

The Javelin DNA Pro is a powerful and versatile ID card printing solution that empowers you to create professional, secure ID cards. With its scalable design, exceptional print quality, and user-friendly features, the Javelin DNA Pro is an ideal choice for organisations of all sizes seeking a reliable and adaptable ID card printing system. Please select either a single sided or double sided printing version.

**Key Features:**

- **Upgradable Design:** The Javelin DNA Pro evolves alongside your requirements. Add modules for dual-sided printing, Wi-Fi connectivity, security locks, and encoding capabilities to create a fully customised printing solution.
- **Automatic Direct-to-Card Printing:** Produces high-quality, professional ID cards directly onto PVC cards.
- **Exceptional Print Quality:** Delivers crisp text, vivid colours, and sharp images with a resolution of 300dpi.
- **High-Speed Performance:** Print monochrome cards at speeds of up to 800 cards per hour, or achieve 180-200 cph for single-sided YMCKO colour printing.
- **User-Friendly Interface:** An intuitive LCD screen simplifies operation and provides clear status updates.
- **Automatic Card Feeder:** Ensures smooth and efficient card handling for uninterrupted printing workflows.
- **Large Capacity Hoppers:** Input hopper holds 100 cards, and the output hopper accommodates 60 printed cards.
- **Security Enhancements (Optional):** Upgrade with data shield ribbon protection and software security lock for added peace of mind.
- **Mobile Printing Convenience (Optional):** The free Javelin mobile app (Android) allows for convenient printing directly from your smartphone.
- **Included Maintenance Kit:** Comes with a cleaning card and long T clearing card to maintain optimal print quality.

**Note: Prices are for base models only. If you require encoding modules, prices are available upon application.**
