Javelin J1000i – Retransfer Printer For ID and Access Control Cards

Description

The Javelin J1000i retransfer printer stands out as the premier solution for organisations seeking the pinnacle of ID card printing excellence. With its unmatched print quality, robust security options, and user-friendly design, the J1000i empowers you to create stunning and secure ID cards that fulfil both aesthetic and functional requirements. If your business prioritises exceptional visual impact alongside top-tier security, the Javelin J1000i Retransfer Printer For ID and Access Control Cards is the ideal choice for your ID card printing needs.

Key Features of The Javelin J1000i:

- **Superior Print Resolution:** Retransfer process for exceptional image quality (600dpi)
- **Full-Bleed Printing:** Superior full-colour brilliance and full-bleed printing
- **Wide Card Compatibility:** PVC, PET, PC, ABS
- **Multiple Ribbon Options:** Supports YMCKO ribbons for full-colour printing and other ribbon options to suit your specific needs.
- **Optional Encoding Capabilities:** Enhances security by adding magnetic stripe, contact chip, or contactless encoding functionalities (sold separately).
- **Optional Lamination:** Integrates seamlessly with a Javelin laminator (sold separately)
- **High-Speed Printing:** Prints full-colour YMCKO cards in under 23 seconds, boosting your productivity.
- **Effortless Operation:** Automatic card feeding simplifies the printing process.
- **Large Capacity Hoppers:** Input hopper holds up to 250 cards
- **Seamless Connectivity:** USB and Ethernet connectivity
- **Intuitive Interface:** User-friendly LCD panel
