

SPC-W220.000

Acre SPCW220 – Housed Remote Transceiver With Antenna

Description

The Acre SPCW220 is a high-performance remote transceiver with antenna, designed to significantly enhance the wireless detection coverage of your Acre Intrusion security system. This versatile solution seamlessly integrates with your existing system, offering extended range and reliable communication for your wireless security devices.

Key Features:

- **Extended Wireless Coverage:** Boosts the communication range of your Acre Intrusion system, ensuring reliable operation for all your wireless devices.
- **Flexible Deployment:** Can be used independently or in conjunction with wireless repeaters for further signal enhancement.
- **Optimal Positioning:** Allows for strategic placement within your building to maximise wireless coverage.
- **Simple Device Enrolment:** Effortless setup process reduces installation time.
- **Wide Device Compatibility:** Works seamlessly with a broad range of Acre Intrusion two-way wireless devices.
- **Tamper Protection:** Features a tamper switch that triggers an alarm if the lid is opened.
- **Unique Device Identification:** Each transceiver has a unique reference number for easy system management.
- **Configurable Input Types:** Offers configuration options for various input types to adapt to specific security requirements.
- **Central or Local Power Options:** Provides flexibility for powered installation near the control panel or local power supply for extended positioning.
- **Simplified Cable Connection:** Easy connection between the Acre Intrusion panel and the SPCW220 for hassle-free setup.

Product Specifications

Weight	kg
Brand	ACRE
Series	SPC
Device-type	Ancillary Products
Operating-temperature	-10°C to 50°C
Protection-rating	IK06, IP30
Connection-type	Wireless
