

SPC-W120.000
Acre SPCW120.000 – Wireless Module With Antenna

Description

The Acre SPCW120.000 wireless module with antenna is a critical component for establishing reliable communication within your Acre intrusion security systems. This easy-to-install solution ensures seamless data exchange between the control panel and wireless security devices, optimising system performance and enhancing overall security.

Key Features:

- Effortless Integration
- Enhanced Wireless Communication
- Extended Reception Range
- Compact Design
- Dedicated Antenna
- Durable Construction

Product Specifications

Weight	kg
Brand	ACRE
Series	SPC
Device-type	Ancillary Products
Connection-type	Wireless
Operating-temperature	-10°C to 50°C
