

SPC-W101.000
Acre SPCW101 – External Aerial Kit For Acre Intrusion

Description

The Acre SPCW101 External Aerial Kit is a user-friendly solution for optimising wireless signal reception within your Acre intrusion security systems. This essential kit offers a range of benefits, including:

Key Features:

- **Enhanced Wireless Reception:** The Acre SPCW101 allows for the connection of an external antenna to GSM or wireless modules housed within a cabinet, significantly improving signal strength and communication range.
- **External Mounting:** The kit includes a weatherproof external antenna for optimal placement, minimising signal obstructions and maximising reception.
- **Pre-assembled Components:** The kit comes with all necessary components, including a stub antenna, a 2-meter cable with connectors, and a mounting bracket, for a quick and hassle-free installation.
- **Universal Compatibility:** The antenna features a standard SMA connector, ensuring compatibility with most GSM and wireless modules equipped for external antenna connection.
