

SPC-N110.000
Acre SPCN110.000 – PSTN Module

Description

The Acre SPCN110.000 PSTN module provides a cost-effective and reliable solution for communicating alarm events from your Acre intrusion security system. This compact module utilises traditional phone lines to transmit alarm signals to a central monitoring station (ARC).

Key Features:

- **PSTN Communication:** Leverages existing phone lines for alarm transmission, offering a familiar and cost-effective communication method.
- **Wide Panel Compatibility:** Compatible with the complete range of Acre SPC control panels, ensuring seamless integration.
- **Plug-and-Play Installation:** The module easily plugs directly onto the main PCB of your control panel, eliminating the need for complex wiring.
- **Common Protocol Support:** Communicates with central stations using industry-standard protocols like SIA and Contact ID, ensuring compatibility with most monitoring services.
- **Remote Programming:** Supports a PPP connection to Acre Intrusion Connect Pro software, enabling remote system programming and configuration updates for simplified management.
- **Backup Communication Option:** The PSTN module can function as a primary communication path or as a reliable backup to a GSM modem, providing redundancy for uninterrupted alarm transmission.

Product Specifications

Weight	kg
Brand	ACRE
Series	<i>Acre Intrusion, SPC</i>
Device-type	<i>Ancillary Products</i>
Operating-temperature	-10°C to 50°C
