

SPC-E651.100
Acre SPCE651.100 – Analysed Zone Expander (8 In and 2 Out)

Description

The Acre SPCE651.100 expander offers a powerful solution for expanding your Acre intrusion security system and incorporating advanced detection capabilities. This expander features 8 analysed zones specifically designed to work with inertia sensors, providing a more reliable and effective way to detect intrusion attempts.

Key Features:

- **8 Analysed Zones:** The Acre SPCE651.100 ideal for connecting inertia sensors, which can detect motion caused by impacts, attempted break-ins, or forced entry, offering a more precise and reliable form of intrusion detection compared to traditional motion sensors.
- **Improved Intrusion Detection:** Analysed zones provide a higher level of security by mitigating false alarms triggered by environmental factors or pets.
- **2 Programmable Relay Outputs:** Program these outputs to perform various functions like triggering alarms, door status updates, or controlling external devices, enhancing system automation and response capabilities.
- **Easy Configuration:** Conveniently configure the expander directly from the embedded web server or any Acre intrusion keypad.
- **Enhanced Security:** Front tamper protection ensures the expander's integrity and system reliability.
- **Flexible Zone Monitoring:** Each zone of the Acre SPCE651.100 can be individually configured for different monitoring requirements to optimise system performance.
- **Volt-Free Relay Outputs:** Provide the greatest flexibility for interfacing with various devices and control systems.
- **X-BUS Interface:** Seamless integration with your existing Acre intrusion system.
- **Status LED and Onboard Buzzer:** Simplify device identification and troubleshooting.
- **Self-Diagnostic Capabilities:** The expander continuously monitors its own functionality, ensuring optimal system performance.

Product Specifications

Weight	kg
Brand	ACRE
Series	<i>Acre Intrusion, SPC</i>
Device-type	<i>Expander</i>
