

SPC-E110.100
Acre SPCE110.100 – Key Switch Expander

Description

The Acre SPCE110.100 key switch expander is a valuable addition to any Acre intrusion security system seeking to enhance user control, system visibility, and functionality. This versatile expander offers a user-friendly interface, programmable features, and reliable operation, making it a cost-effective solution for improved security management.

Key Features:

- **3-Position Key Switch:** Provides an easy and intuitive way to control system functions based on key position (e.g., unlock keypad, set area, control gate).
- **Freely Programmable LEDs:** Customise the LED indicators to display relevant system status information, such as key switch position or area setting states, for improved situational awareness.
- **Programmable Relay Output:** Automate system responses or control external devices (lights, sirens) based on key switch position changes.
- **Tamper Protection:** Front and back tamper contacts ensure the integrity of the expander and system reliability.
- **Standard Replaceable Key Cylinder:** Allows for key customisation to match your existing system's keys.
